Nussbaum Mind

Rafi has two empty toy bowls. One is big. One is little. He sets them on the rug.

Rafi puts the big bowl on the little one. It rests across the top. It does not go inside.

Mommy sits beside him. "Try this one first," she says. She puts the big bowl on the rug, open side up.

Rafi lifts the little bowl. He lowers it into the big bowl. It goes inside. Rafi takes it out and tries again.

Now he turns the big bowl upside down. He tries to put the little bowl inside. The opening is underneath.

Rafi turns the big bowl back. He puts the little bowl inside. Mommy carries both bowls to their low shelf.
